

Potential Research Questions

1. How can the project impact:

- Ridership and physical activity levels?
- Transit travel time to work? To health care?
- Transportation affordability / disposable income?
- Economic development / redevelopment?

2. How can the project increase access to:

- Hospitals, clinics, and healthy food sources?
- Jobs and education?
- Social services, parks, and exercise opportunities?

3. How can the project affect frequency and severity of bike and pedestrian crashes?

4. How can the increased physical activity and commute benefits of the project affect obesity, respiratory disease, diabetes, and other chronic disease?

5. How can the project affect mental health, hypertension and corridor residents' and workers' perception of quality of life?

6. How can the project affect air quality and asthma levels?

Short List Indicators (bold indicates primary indicator)

1. Economic Return on Investment (Property Value)
2. Transportation and Housing Affordability
3. Transit Commute Time to Work
4. Bicyclist and Pedestrian Injury and Fatality Rates
5. Sense of Community / Quality of Life
6. Mental Health / Depression / Stress and Hypertension
7. Respiratory Disease, Obesity, Diabetes, and Other Chronic Disease
8. Transit Access to Health
9. Asthma / Air Quality
10. Income and Poverty Levels
11. Transit Access to Education
12. Transit Access to Healthy Food
